PROJECT

Email Sender API Project

July 2023- Oct 2023

Project Link

<https://gitlab.com/dongreriya48/royalproject>

- Developed with Python (Django) and JavaScript .
 - Features user authentication, email composition with attachments, and recipient management.
 - Integrates with SMTP servers for sending emails.
 - Maintains email history for tracking communications
 - Uses Django ORM with SQLite/PostgreSQL
 - Ensures responsive design for accessibility across devices
 - Supports deployment on Heroku, AWS, or self-hosted servers
 - Future enhancements: email templates, third-party API scheduling integrations, SSL/TLS security.
-

SKILLS

Python, HTML

Django (DRF)
